

## 17 Major Facilities Zone

### 17.1 Purpose

- a) Major facilities are substantial, distinct entities which differ significantly from their surroundings. Included in the Major Facilities Zone are Waikato Stadium, Seddon Park, Claudelands Events Centre, Te Rapa Racecourse, Waikato Hospital, Wintec City Campus, ~~and~~ Wintec Rotokauri Campus and Te Awa Lakes Adventure Park.
- b) In addition to these principal uses it should also be recognised that major facilities include a number of related or supporting activities that contribute to the overall functioning of the facility.
- c) The City’s major institutions and facilities enable the community to meet its social, cultural and economic needs. These facilities also contribute to the visual amenity of the City through their landscaping and provision of open space. They make a positive design contribution in terms of their identity, through landmark buildings and other development.

### 17.2 Objectives and Policies: Major Facilities Zone

Objective	Policies
<b>17.2.1</b> Major facilities develop and operate successfully and contribute to the economic, social and cultural wellbeing of the City.	<b>17.2.1a</b> Major facilities enable a mixture of activities while retaining the principal purpose.
	<b>17.2.1b</b> The positive effects of the use and development of major facilities are recognised and acknowledged.
	<b>17.2.1c</b> The adverse effects of use and development of major facilities on neighbourhood amenity values are minimised.
	<b>17.2.1d</b> Development of major facilities enables the scale and configuration of buildings and open space to contribute positively to the visual amenity values of the City.
	<b>17.2.1e</b> Development of major facilities demonstrates quality urban design, particularly at their interface with public areas.
	<b>17.2.1f</b> Development of major facilities is in general

	accordance with a Concept Development Consent.
<b>Explanation</b>	
<p><i>Each major facility is a large-scale complex with a range of activities. Therefore the flexibility to develop and adapt is important. However, the size and complexity of major facilities can make it difficult to accommodate them under the normal District Plan provisions and zones.</i></p> <p><i>The intention of the Major Facilities policies is that each major facility will continue to be used for the principal purpose currently associated with that site, together with other complementary activities. It is not contemplated that land use at any of the sites will change fundamentally.</i></p> <p><i>The effect of major facilities on the wider environment and on those areas which immediately adjoin the facility must be addressed. Harmonious existence with neighbours is an important element in the long-term success of major facilities.</i></p> <p><i>The development of major facilities provides opportunities, because of the scale of development and single ownership of these large sites, with innovative and attractive designs which will enhance the locality.</i></p>

## 17.4 Rules – Concept Development Consent

### 17.4.1 Provision of Concept Development Consent

- a) New buildings are a permitted activity in the Major Facilities Zone when a Concept Development Consent application has been granted by Council, unless otherwise provided for in 17.4.1(b), (c) (d) and (h) below.
- b) Buildings and/or work that are permitted before the approval of a Concept Development Consent shall be:
  - i. Maintenance or repair to existing buildings
  - ii. Demolition or removal of buildings
  - iii. Accessory buildings
- c) An application for a Concept Development Consent shall be for a whole major facility site; however development of the site may proceed in stages.
- d) The activity status of a Concept Development Consent application shall be classified as restricted discretionary, unless an activity that forms part of the application is:
  - i. Discretionary, in which case the Concept Development Consent application is a discretionary activity.
  - ii. Non-complying, in which case the Concept Development Consent application is a non-complying activity.
- e) Concept Development Consents shall be formulated in accordance with the standards in this chapter.

- f) The development of a Concept Development Consent shall not preclude the requirement to comply with the relevant standards of the plan not addressed in the Concept Development Consent.
- g) Where any development or activity is not in accordance with the provisions of the Concept Development Consent, then assessment against the provisions of the Major Facilities Zone or separate resource consent shall be required for that development or activity.
- h) The Concept Development Consent for the Te Rapa Racecourse is not required to cover the Thoroughbred Business Park (see Figure 17.3a).

**Note**

1. A Concept Plan granted under the previous District Plan provisions is deemed to be a Concept Development Consent for the purposes of this rule.

## 17.5 Rules – General Standards

- a) All activities shall comply with the following standards. For the sake of clarity, if there is a conflict between a general and specific standard within this chapter then the specific standard shall apply.
