

## IMPORTANT NOTICE

run a  
mug  
before  
drinking

**Hamilton City Council, in conjunction with the Ministry of Health, recommends flushing a mugful of water from your drinking-water tap each morning before use to remove any metals that may have dissolved from your plumbing fittings.**

Hamilton City Council supplies safe, high quality 'Aa' grade water. But some plumbing fittings have the potential to allow minute traces of metals to accumulate in water left standing in the fittings for several hours.

Although the health risk is small, we recommend this simple precaution for all households, including those on public and private water supplies.
